

TAP & EPN-TAP

Tuesday, October 20, 2020 2:06 PM (3 minutes)

We shortly introduce TAP and EPN-TAP in the context of the IHDEA. TAP is the Table Access Protocol, a science agnostic API to search into relational databases. EPN-TAP is a TAP interface, with a specific metadata dictionary specifying the table columns. EPN-TAP is dedicated to solar system sciences (planetary and heliophysics).
