

# JETSET FP6, " Jet Simulations, Experiments, Theory" 10 years later, what is next?

**mardi 22 mai 2018**

**S2 Observations and models: ALMA - Salle de conférence du château (14:00 - 15:00)**

time	[id] title	presenter
14:00	[11] Rotating molecular cavities scrutinized by ALMA: what can they tell us about magnetic fields in protoplanetary disks ?	Mme DOUGADOS, catherine
14:30	[7] Connection between jets, winds and accretion in T Tauri stars	NISINI, Brunella

**S2 Observations and models: New observations since the end of JETSET - Salle de conférence du château (15:00 - 16:00)**

time	[id] title	presenter
15:00	[10] Jets and Outflows from the UWISH2 Survey	Dr FROEBRICH, Dirk
15:30	[13] ANALYSIS OF THE PHYSICAL PROPERTIES OF JETS/OUTFLOWS IN T TAURI STARS	Mme LOPEZ-MARTINEZ, Fatima

# mercredi 23 mai 2018

## S2 Observations and models - Salle de conférence du château (10:45 - 12:45)

time	[id] title	presenter
10:45	[9] Accretion bursts from young stars	EISLÖFFEL, Jochen
11:15	[29] Jet precession and synchronous outbursts in the binary (triple?) protostar SVS13A	CABRIT, Sylvie
11:45	[34] The Musca molecular cloud: An interstellar symphony	Dr TRITSIS, Aris
